McLeod Health Seacoast

McLeod Seacoast Brings Advanced Health Services to Horry & Brunswick Counties

Serving northern Horry County (SC) and southern Brunswick County (NC), McLeod Seacoast has 50 acute care beds, along with an expanding list of cardiac, vascular, women's, surgical, orthopedic and other services. We have recently completed a new 9,600 sq. ft. Emergency Department that allows us to provide more streamlined services and includes new exam rooms and state-of-the-art trauma facilities.

McLeod Seacoast is currently in the construction phase of an additional expansion of 50 beds that will feature a new inpatient tower, new operating rooms, a same-day services suite, and a cardiac catheterization lab.

Generous giving to the McLeod Foundation also helps fund essential programs, services and equipment supporting McLeod Seacoast.
