

# Breast Cancer Warning Signs

Some of the warning signs of breast cancer include:

- Painless new lump in the breast or underarm (armpit)
- Thickening or swelling of part of the breast
- Irritation or dimpling of breast skin
- Redness or flaky skin in the nipple area of the breast
- Pulling in of the nipple or pain in the nipple area
- Nipple discharge other than breast milk, including blood
- Any change in the size or the shape of the breast.

Keep in mind that these symptoms can occur with other conditions that are not cancer.

To schedule a mammogram at one of our hospitals or on the McLeod Mobile Mammography Unit, please call 843-777-2095.

For more information on breast cancer, please contact Tracey O'Neal, the McLeod Breast Oncology Navigator, at (843) 777-5418.
