

EXPERIENCE THE STRENGTH OF A TEAM FOCUSED ON YOU.

At every McLeod Family Medicine Residency medical office, a team of resident doctors, guided by experienced physicians, works together to provide timely, personalized care for your health.

Who Takes Care of You

Each McLeod Family Medicine Residency team includes:

- **Attending Physician:** An experienced doctor who oversees and confers with residents to ensure the highest standards of care.
- **Resident Doctors** – *Licensed physicians in training*
 - Year 1 Resident: Builds clinical skills and patient relationships
 - Year 2 Resident: Assumes greater responsibility and mentors newer residents
 - Year 3 Resident: Leads the team and coordinates the patient's care plan

Why You Might See Different Doctors

Our residents rotate through different clinical areas to gain experience. Even though you may see different team members, your care remains consistent and connected. Your entire team shares your medical history and care plan — so every visit is informed, coordinated, and personal.

How This Benefits You

- **Always Someone Available** – You can be seen when you need care.
- **Collaborative Expertise** – Multiple doctors and an attending review your care together.
- **Latest Medical Knowledge** – Residents bring the latest medical training and evidence-based care.
- **Personalized & Compassionate** – You receive attentive, thoughtful care focused on your well-being.

Our Promise

You're not just a patient — you're part of a caring team dedicated to your health and to training the next generation of family physicians. Together, we're building healthier lives — today and for the future.
